

Science with Passion

Liquid Handler LH 8.1 - for complex analytical LC

- **Automatic** sample preparation to speed up your workflow
- **No sample loss** and high precision injection of small and large sample volumes
- **High-throughput** with up to 4 robotic coolers for max. of 24 racks or well plates
- **Flexibility** of modules and functions according to your needs

Complex analytical LC tasks made easy

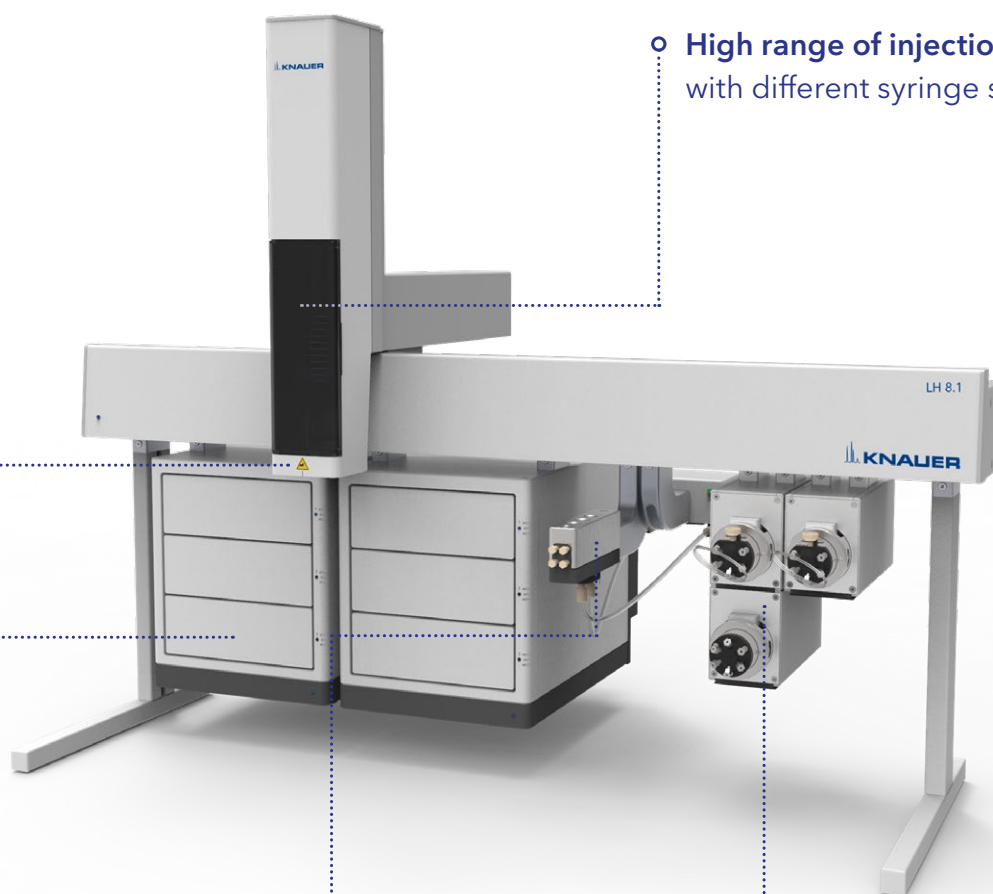

Experience a new dimension of automation in analytical sample introduction with the Liquid Handler LH 8.1 from KNAUER.

- **Prepare next injection**

to minimize the cycle time through software control

- **High range of injection volumes**

with different syringe sizes and types

- **Robotic cooler**

hosting up to 6 racks or wellplates for each robotic cooler

- **Fast high performance**

washing station with two different wash solvents to minimize carry over

- **Modular design**

to adapt the system to your workflow of today and easily transform it for future challenges

think **LC**. think **KNAUER**.
